

TECHNOLOGY STAFFING SINCE 1999

Technology talent for critical systems.

**Specialized technology staffing with deep
mainframe expertise.**

Resourcesys supports organizations, public-sector programs, prime contractors, and systems-integration partners with experienced professionals for contract and contract-to-hire assignments.

Mainframe-led. Broadly capable.

THE TALENT CHALLENGE

Critical systems. A shrinking talent pool.

Organizations continue to depend on mainframe platforms while experienced professionals become increasingly difficult to identify and recruit. Resourcesys helps close that gap with focused technology staffing.

Mainframe talent

COBOL · JCL · CICS · DB2 · VSAM · REXX · IMS · z/OS

Application developers, systems professionals, architects, performance engineers, security and storage specialists, production-support engineers, and modernization professionals.

MODERNIZATION Legacy assessment · Java and Spring Boot APIs · database modernization · integration · automation · DevOps tooling

Broader technology staffing

Cloud and SRE · infrastructure · cybersecurity · software and data · enterprise applications · technical and program delivery

HOW RESOURCESYS RECRUITS

A practical path from requirement to assignment.

- 01 Understand the requirement**
Platform, responsibilities, environment, timeline, location, and engagement model.
- 02 Evaluate relevant experience**
Technical alignment, production responsibilities, communication, and assignment fit.
- 03 Coordinate selection**
Candidate presentation, interviews, documentation, and onboarding.
- 04 Support the engagement**
Continued communication as assignment needs and priorities develop.

Two clear ways to engage

Organizations and teaming partners: request technology talent and review company documents.

Technology professionals: browse current opportunities and submit a résumé.
