

CAPABILITY STATEMENT

Technology staffing with deep mainframe expertise.

Resourcesys is a founder-led technology staffing company established in 1999, supporting enterprise, public-sector, and systems-integration programs with experienced professionals for contract and contract-to-hire assignments.

Core capabilities

MAINFRAME ENGINEERING

COBOL, JCL, CICS, DB2, VSAM, REXX, Easytrieve, IMS, z/OS, systems programming, architecture, performance, security, and production support.

MAINFRAME MODERNIZATION

Legacy assessment, database modernization, Java and Spring Boot APIs, integration, automation, testing, and DevOps enablement.

BROADER TECHNOLOGY STAFFING

Cloud, SRE, infrastructure, applications, data, cybersecurity, enterprise applications, technical leadership, and program delivery.

Differentiators

- **Mainframe specialization** Recruiting grounded in the platform, responsibilities, environment, and modernization context.
- **Founder-led access** Direct senior involvement when an engagement needs a decision.
- **Experienced-talent focus** Alignment based on technical depth, assignment structure, and fit.
- **Teaming-ready** Focused recruiting capability and supplier-diversity credentials for larger programs.
